To Whom It May Concern,

**REPORT NATHAN BUSSE DOB: 06/12/2002**

Nathan has been a long standing patient of the Low Vision Care Centre in Blackheath. He has an eye condition that causes permanent, irreversible vision loss in his right eye with a loss of visual field, and no vision in his left eye. Nathan has reduced best corrected vision, meaning that spectacles do not improve his vision to 100%. This also means that he requires magnification.

Because of Nathan's decreased best corrected vision and visual field in his seeing eye, his reading and processing speed has been affected. He is currently given the prescribed extra time for tests and exams, but this is still not sufficient for him to complete in the extended time. Nathan is not incapable of doing the work, he however battles to complete the tests and exams because of his low vision and I therefore recommend additional extra time to perform to the best of his ability. By allowing the additional time, Nathan could get a matric result that is reflective of his abilities and not his inabilities.

Please feel free to contact me with any questions you might have.

Kind Regards
